Abstract

Currently, the act of sexual harassment as one form of crime in Indonesia, has increased. Information services in the implementation of guidance and counseling have been implemented in schools in an effort to prevent the increase in sexual harassment. This study aims to describe: (1) sexual harassment, (2) information services that students follow to understand rules related to sexual harassment, and (3) information service guides using contextual teaching and learning in the prevention of adolescent sexual harassment.

Discussion topics on the prevention of sexual harassment traits, involving: sexual harassment and its consequences, rules relating to sexual harassment and the impact of its offenses, and gender tolerance in implementing rules related to sexual harassment, and (3) information service guides using contextual teaching and learning is effective in preventing sexual harassment trends among high school students.

Keywords: Information services, contextual teaching and learning, and sexual harassment
