

## **ABSTRAK**

### **PEMBANGUNAN GEDUNG DAN LANSEKAP GEDUNG KULIAH BERSAMA (GEDUNG H) UNIVERSITAS ANDALAS LIMAU MANIS PADANG.**

Oleh : ABER SAKTI

Practice Field of Industries is one of the requirements for student-D3 in Civil Engineering of UNP to complete their final college. The writer conducted in Practice Field of Industries in Project Build erect and Landscape of build used all students (Building H) Andalas University in Padang.

In this project that will be doing is making Build to study and other build that support. While Practice Field of Industries, the writer look a job in the field and found some interest things. Which One of other will be made into a case study contained in the Final Project of writer . Interesting findings that will be adopted into the case study "**Method of Implementation of Column L**".

Changes in form of a square column to form column of L result in material savings in the column. In planning there are a few things to consider a cheaper cost, column L also serves to carry the shear forces acting on the building.
