PROCEEDINGS

4th International Conference on Technical and Vocational Education and Training (TVET)

Theme: Technical and Vocational Education and Training for Sustainable Societies

General Chair:

- Prof. Ganefri, Ph.D. (Rector Universitas Negeri Padang)

Program Committee Chair:

- Dr. Fahmi Rizal, M.Pd., M.T. (Dean Fakultas Teknik Universitas Negeri Padang)

Steering Committee:

- Prof. Dr. Nizwardi Jalinus, M.Ed. (Universitas Negeri Padang, Indonesia)
- Prof. Dr. Ali Ghuftron Mukti, M.Sc., Ph.D. (Direktorat Jenderal Sumber Daya Ilmu Pengetahuan Teknologi Pendidikan Tinggi Kementerian RISTEKDIKTI)
- Prof. Dr. David Stein, Ph.D. (OHIO State University, USA)
- Prof. Junji Kiyono (Tottori University, Japan)
- Prof. Maizam Alias, Ph.D. (UTHM, Malaysia)
- Prof. John Williamson, Ph.D. (University of Tasmania, Australia)
- Prof. Selamat Triono Ahmad, Ph.D. (Universitas Negeri Medan, Indonesia)
- Dr. Rijal Abdullah, M.T. (Universitas Negeri Padang, Indonesia)
- Drs. Hambali, M.Kes. (Universitas Negeri Padang, Indonesia)
- Drs. Hanesman, MM. (Universitas Negeri Padang, Indonesia)
- Dr. Ir. Arwizet K, ST., MT. (Universitas Negeri Padang, Indonesia)
- Drs. Martias, M.Pd. (Universitas Negeri Padang, Indonesia)
- Drs. Raimon Kopa, MT. (Universitas Negeri Padang, Indonesia)

Scientific Committee:

- Prof. Sai Vanappali (University of Ottawa, Canada)
- Prof. Junji Kiyono (Tottori University, Japan)
- Prof. Maizam Alias, Ph.D. (UTHM, Malaysia)
- Prof. Jailani Mhd. Junos, Ph.D. (UTHM, Malaysia)
- Prof. Dr. Nizwardi Jalinus, M.Ed. (Universitas Negeri Padang, Indonesia)
- Ir. Syahril, ST., MSCE., Ph.D. (Universitas Negeri Padang, Indonesia)
- Prof. Dr. Kasman Rukun, M.Pd. (Universitas Negeri Padang, Indonesia)
- Prof. Dr. Ing. I Made Londen B (Institut Teknologi Sepuluh November Surabaya)

Reviewer:

- Prof. Dr. Nizwardi Jalinus, M.Ed. (Universitas Negeri Padang, Indonesia)
- Dr. Hansi Effendi, ST. M.Kom. (Universitas Negeri Padang, Indonesia)

- Rusnardi Rahmat Putra, ST., MT., Ph.D. (Universitas Negeri Padang, Indonesia)
- Ir. Riki Mukhayar, ST. M.T. Ph.D. (Universitas Negeri Padang, Indonesia)
- Risfendra, S. Pd. MT., Ph.D. (Universitas Negeri Padang, Indonesia)
- Krismadinata, ST. MT. Ph.D. (Universitas Negeri Padang, Indonesia)
- Dr. Asrul Huda, S. Kom. M.Kom.(Universitas Negeri Padang, Indonesia)
- Dr. Remon Lapisa, MT. M.Sc. M.Eng. (Universitas Negeri Padang, Indonesia)
- Wawan Purwanto, S.Pd. M.T., Ph.D. (Universitas Negeri Padang, Indonesia)

Editor:

- Prof. Dr. Nizwardi Jalinus, M. Ed. (Universitas Negeri Padang, Indonesia)
- Prof. Dr.Kongkiti Phusavat (Kasetsart University, Thailand)
- Prof. Maizam Alias, Ph.D. (UTHM, Malaysia)
- Prof. Dr. Ramlee Bin Musthafa (Universiti Pendidikan Sultan Idris Malaysia)
- Prof. Dr. Michael Koh, Ph.D. (Republic Politecnic Singapore)
- Krismadinata, ST., MT., Ph.D. (Universitas Negeri Padang, Indonesia)

Cover Design:

- Dr. Asrul Huda, S.Kom., M.Kom (Universitas Negeri Padang, Indonesia)

Layout:

- Dr. Remon Lapisa, MT., M.Sc. M.Eng (Universitas Negeri Padang, Indonesia)
- Rahmat Azis Nabawi, S.Pd., M.Pd.T.(Universitas Negeri Padang, Indonesia)
- Syaiful Islami, S.Pd., M.Pd.T.(Universitas Negeri Padang, Indonesia)

FOREWORD

Welcome for all respected scholars, researchers, post graduate students and especially Keynote Speakers to the 4 ICTVET. The theme of the conference focus on Technical and Vocational Education and Training for sustainable societies and consist of six subthemes. i.e Development of learning model on TVET, Workplace Learning and entrepreneurship, Innovation on applied engineering and information technology, Management and Leadership on TVET, Vocational and Technical Teachers education, and Assessment and Evaluation on TVET.

Sustainable society should be followed by the improvement of various factors that have impacts to the quality of vocational and technical education and training, particularly to overcome the competitiveness of the world business. As we have already known the rapid change of technology as well as the change of demography, having a great effects to the life of peoples in this world, The competitiveness need a collaborativeness to survive the life of millions peoples who lost their jobs. Young peoples as a productive generation have to be creative and innovative to face the competitiveness. So this proceeding contents consist of various findings of research in the field of vocational and technical education as well as applied technology and mainly based on the subthemes of the conference.

Finally, we would like to thank a million for all participants of this conference and all parties who support the success of this conference. Hopefully the seminars and scientific work of this seminar can be a reference material for basic education and elementary school teacher education in Indonesia.

Padang, July 2, 2018

Tim Editor

CONTENT PROSIDING ICTVET 2017 REPOSITORY UNP

1. THE PROSPECT OF OFFSHORE IRON SAND IN TIRAM BEACH PADANG PARIAMAN REGENCY WEST SUMATERA Adree Octova, Ansosry, Yoszi Mingsi Anaperta and Indah Elok Mukhlisah.....	1-7
2. OPTIMIZE OF LEAST-SQUARE INVERSE CONSTRAIN METHOD OF GEOELECTRICAL RESISTIVITY WENNER-SCHLUMBERGER FOR INVESTIGATION ROCK STRUCTURES IN MALALAK DISTRICTS OF AGAM WEST SUMATRA Akman, Amir Harman, Putra Amali.....	8-13
3. CLUSTER ANALYSIS DISTANCE INTER DISTRICT USING SINGLE LINKAGE METHOD FOR DETERMINATION OF MPLIK CAR OPERATION ZONE IN MEDAN CITY Ali Ikhwan, Yasmin Mohd Yacob, Solly Aryza	14-16
4. EFFECT OF MIND MAPPING LEARNING METHODS ON LEARNING OUTCOMES Almasri	17-21
5. DESIGN OF SKILL ASSESMENT IN COMPUTER NUMERICAL CONTROL PROGRAMMING SUBJECT Ambiyar, Febri Prasetya, Yufrizal.....	22-26
6. MODIFICATION OF INPUT PUSHER ASSEMBLY OF LASER MARKING MACHINE Arif Rahman Hakim	27-34
7. COLLABORATIVE PROJECT-BASED LEARNING: AN INSTRUCTIONAL DESIGN MODEL IN THERMODYNAMICS ON TECHNICAL VOCATIONAL EDUCATION AND TRAINING (TVET) Arwizet K, Nizwardi Jalinus, Krismadinata.....	35-39
8. DEVELOPMENT OF EMPLOYEE INFORMATION SYSTEM-BASED WEB IN MAN 1 PADANG Asrul Huda, Rendy Harisca.....	40-46
9. DECISION SUPPORT SYSTEM (DSS) WITH WP AND MFEP METHODS IN SELECTION OF BEST BABY CLOTHES Asyahri Hadi Nasyuha, Rahmat Sulaiman Naibaho, Saniman.....	47-53
10. IMPROVING LEARNING MOTIVATION THROUGH IMPLEMENTATION PROBLEM SOLVING LEARNING STRATEGY Budi Syahri, Primawati, Syahrial	54-58
11. THE MODELING OF MASSIVE LIMESTONE USING INDICATOR KRIGING METHOD (CASE STUDIES OF MASSIVE LIMESTONE IN PT SINAR ASIA FORTUNA) Dedi Yulhendra, Yoszi Mingsi Anaperta	59-65
12. ELECTRONIC COMPONENT TESTER AS A LEARNING MEDIA FOR CLASS X STUDENTS AUDIO VIDEO ENGINEERING SMKN 1 SUMBAR Delsina Faiza, Thamrin, Ahmaddul Hadi, Yongki Saputra.....	66-74

13. EFFECTIVENESS OF INTERACTIVE INSTRUCTIONAL MEDIA ON ELECTRICAL CIRCUITS COURSE: THE EFFECTS ON STUDENTS COGNITIVE ABILITIES Doni Tri Putra Yanto, Sukardi, Deno Puyada	75-80
14. EVALUATION OF LEARNING PROCESS USING CIPP MODEL Dwi Sudarno Putra, Misra Dandi Utama, Dedi Setiawan, Remon Lapisa, Ambiyar	81-86
15. IMPLEMENTATION OF CONTEXTUAL TEACHING AND LEARNING ON ANALYZING ELECTRICAL CIRCUITS SUBJECT Dwiprima Elvanny Myori, Citra Dewi, Erita Astrid, Ilham Juliwardi	87-91
16. DOMESTIC EMPLOYMENT PROCESSING SYSTEM ON WORKING PROTECTION AND TRANSMIGRATION USING GEOGRAPHIC INFORMATION SYSTEM (GIS) Eddis Syahputra Pane, Kori Cahyono	92-98
17. CONDUCTING LABOR MARKET ASSESSMENT IN ENGINEERING CURRICULUM DEVELOPMENT Edi Septe, Suryadimal, Wenny Marthiana, Nizwardi Jalinus, Ramli.....	99-105
18. DIFFERENCES IN LEARNING OUTCOMES IN THE PRACTICE OF MICROCONTROLLER SYSTEM USING MCS51 MICROCONTROLLER TRAINER KIT Edidas, Dedy Irfan.....	106-108
19. MICROCONTROLLER SKILL TRAINING FOR SMKN 2 PAYAKUMBUH AND SMKN 1 SUNGAI RUMBAI Edidas, Legiman Slamet and Ilmiyati Rahmy Jasril.....	109-113
20. THE EFFECT OF ISLAMIC WORK ETHICS AND SPRITUAL LEADERSHIP ON EMPLOYEE'S COMMITMEN IN PADANG SHARIA HOTELS Eka Mariyanti, Rasidah Nasrah.....	114-120
21. THE DESIGNING OF THE PROTOTYPE OF THE AIR QUALITY MEASURING HELMET Eko Hariyanto, Solly Ariza Lubis, Zulham Sitorus, M. Iqbal.....	121-124
22. REVIEW DEVELOPING OF PROJECT BASED AS INNOVATION INSTRUCTIONAL Eko Indrawan	125-130
23. IMPROVING THE ESP STUDENTS' VOCABULARY BY USING PICTURES IN CIVIL ENGINEERING STUDY PROGRAM AT FIRST SEMESTER OF EKASAKTI UNIVERSITY PADANG Elda Martha Suri.....	131-133
24. INTEGRATED SERVICES SYSTEMS ELECTRONIC DEVELOPMENT FACULTY OF ENGINEERING PADANG STATE UNIVERSITY BASED ON JAVA DESKTOP Elfi Tasrif, Asrul Huda.....	134-137
25. THE EFFECT OF STRATEGY OF TRAINING MODELS IN LEARNING ELECTRICAL INSTALLATION Elfizon, Syamsuarnis, Oriza Candra.....	138-141

26. SOFTWARE DEVELOPMENT OF CONCENTRATION SELECTION WITH INTEREST TEST BASED ON INTELLIGENT SYSTEM Elin Haerani.....	142-149
27. NEEDS ANALYSIS ON INCREASING COMPETENCY TEST RESULTS STUDENTS IN S1 PROGRAM OF PUBLIC HEALTH SCIENCES STIKES HANG TUAH PEKANBARU Emy Leonita, Nopriadi, Ahmad Satria Efendi, and Niswardi Jalinus	150-155
28. THE READINESS OF STUDENT TO ENTREPRENEUR THROUGH INCORPORATION OF THE PILOT PROJECT PRACTICE Ernawati.....	156-161
29. EFFECT OF PROJECT BASED LEARNING MODEL IN IMPROVING STUDENT LEARNING RESULT Erwinsyah Simanungkalit.....	162-166
30. DESIGNING LEARNING TOOLS BY USING PROBLEM BASED INSTRUCTION (PBI) MODEL ON ENERGY RESOURCE MATERIAL INTEGRATED TO ENERGY SAVING CHARACTER Estuhono.....	167-170
31. THE DESIGN OF LECTURER PERFORMANCE EVALUATION MODEL BASED ON ANALYTIC NETWORK PROCESS (ANP) Fenny Purwani, Niswardi Jalinus, Ambiyar.....	171-175
32. DEVELOPMENT OF ONLINE EXAMINATION SYSTEM USING WONDERSHARE QUIZCREATOR BASED ON WEB Fitri Yanti, Rijal Abdullah, Krismadinata	176-180
33. THE VALIDITY OF TRAINING MATERIALS SCIENCE AND DEVICES SUBJECT AT DEPARTMENT OF ELECTRICAL ENGINEERING Fivia Eliza, Dwiprima Elvanny Myor, Hastuti.....	181-185
34. TRAINING MODEL-BASED KNOWLEDGE MANAGEMENT SYSTEM FOR VOCATIONAL HIGH SCHOOL TEACHERS SKILLS ENGINEERING COMPUTER NETWORK Gunawan Ali, Kasman Rukun, Syahril	186-193
35. FUZZY LOGIC BASED CONTROLLER FOR BUCK CONVERTER Habibullah, Irma Husnaini, Asnil.....	194-200
36. A NEW DESIGN OF HANDLESS STIRRED DEVICE Hanne Aulia, Riki Mukhaiyar	201-204
37. ACADEMIC INFORMATION SYSTEM OF STIKES PERINTIS PADANG Harleni, Marisa.....	205-209
38. DESIGN OF ELECTROMAGNETIC REGENERATIVE SHOCK ABSORBER AS A TOOL OF HARVESTING VIBRATION ENERGY ON VEHICLE Hasan Maksum, Aslimeri, Putra Jaya, Wanda Afnison.....	210-213

39. THE EFFECTIVENESS OF USING POSTER AND VIDEO MEDIA IN EDUCATION ABOUT DANGERS OF SMOKING ON KNOWLEDGE AND ATTITUDES OF SENIOR HIGH SCHOOL 12 PEKANBARU STUDENTS Hastuti Marlina, Reno Renaldi	214-217
40. A MODEL PREVENTIVE MAINTENANCE CONTROL IN THE MACHINE TURNING AT WORKSHOP THE FACULTY OF ENGINEERING OF THE STATE UNIVERSITY IN PADANG Hefri Hamid, Nizwardi Jalinus, Syahril, Ambiyar, Febri Prasetya	218-224
41. INVESTIGATION OF CHEMICAL FEASIBILITY AND DISTRIBUTION OF IRON SAND RESERVE REGIONAL AREA OF AGAM DISTRICT FOR CEMENT RAW MATERIAL IN PT. SEMEN PADANG Heri Prabowo, Sumarya.....	225-227
42. THE DEVELOPMENT OF INTERACTIVE MULTIMEDIA-BASED LEARNING MEDIA USING ADOBE FLASH CS3 AND CAMTASIA IN PROBLEM-SOLVING LEARNING IN ELEMENTARY MATHEMATICS OF IN STUDENT PGSD STKIP ADZKIA IN PADANG Ika Parma Dewi, Lativa Mursida, Rizkayeni Marta.....	228-235
43. ART EDUCATION THROUGH FREE EXPRESSION APPRECIATES, DISCIPLINE SCIENCE, AND MULTICULTURAL AS EFFORTS TO IMPROVE STUDENT CREATIVITY Indra Irawan	236-242
44. THE INFLUENCE OF USING ANIMATION MEDIA AND LEARNING MOTIVATION TOWARD LEARNING RESULT OF AUTOMOTIVE STUDENTS IN SMK N 2 PAYAKUMBUH Indra Wahyu, Fahmi Rizal, Rijal Abdullah.....	243-248
45. INFORMATION SYSTEM AND REPORT VALUE PROCESSING BASED MICROSOFT VISUAL BASIC 6.0 ON SENIOR HIGH SCHOOL (CASE STUDY AT SMAN 12 PADANG) Indra Wijaya, Isra Mouludi, Fandy Neta, Yaslinda Lizar, Satria Ami Marta	249-256
46. DESIGN OF SIMULATOR FOR REPLACEMENT OF TOOLS PRACTICE DIGITAL ENGINEERING IN THE VOCATIONAL SCHOOL Irwan Yusti, Ganefri, Ridwan	257-259
47. CELL ROTATION TO RESOLVE THE WEAKEST CELL DAMAGE IN THE BATTERY PACK IN DISCHARGING PROCESS Irwanto Zarma Putra, Citra Dewi	260-263
48. IMPROVEMENT OF CONCRETE QUALITY WITH ADDITION OF SUNUA PASIR PADANG PARIAMAN WEST SUMATRA Iskandar G. Rani, Widya Salmita.....	264-268
49. SIMPLE WATER PURIFIER USING MULTILEVEL SYSTEM Jasman, Nelvi Erizon, Syahrul, Junil Adri, Bulkia Rahim	269-272

50. DESIGN OF LIBRARY INFORMATION SYSTEM USING BARCODE ON SMAN 1 SOLOK CITY Jeprimansyah	273-280
51. THE DESIGN OF THE SIGNAL MEASUREMENT DEVICE OF BODY'S BIOELECTRICAL IMPEDANCE By USING THREE ELECTRODES Juli Sardi, Hastuti, Ali Basrah Pulungan	281-286
52. PATIENT INFORMATION SYSTEM DESIGN ON MATERNITY HOSPITAL RESTU IBU PADANG Jusmita Weriza	287-293
53. IDENTIFICATION THE IMPORTANCE OF LEARNING TOOLS DEVELOPMENT ON ENERGY-EFFICIENT BUILDING INNOVATIONS USING ROOT CAUSE ANALYSIS Kemala Jeumpa	294-297
54. DECISION SUPPORT SYSTEM FOR REKOMENDATION CERTIFICATION TEACHER ON VOCATIONAL HIGH SCHOOL Khairul, Rahmad Budi Utomo.....	298-302
55. IMPACT OF THE TWI LEARNING MODEL IN LEARNING STONE AND CONCRETE CONSTRUCTIONS ON VOCATIONAL EDUCATION Kinanti Wijaya, Daniel IrvansiusTampubolon.....	303-307
56. THE EFFECT OF SOFTWARE MASTERCAME TOWARD MECHANICAL ENGINEERING STUDENTS PERFORMANCE IN MAKING PRODUCT WITH CNC MILLING MACHINE IN VOCATIONAL HIGH SCHOOL 1 PADANG Kms. Muhammad. Avrieldi, Suparno, Nofri Helmi.....	308-310
57. LEARNING BROADCAST VIDEO SYSTEM WITH H264 VIDEO ENCODING RASPBERRY PI Leni Marlina, Aswandi.....	311-315
58. OPTIMIZATION OF EXTERNAL LIGHTNING PROTECTION SYSTEM DESIGN IN BUILDING CENTER FOR INFORMATION TECHNOLOGY AND DATA BASE (PTIPD) UIN SUSKA RIAU Liliana, Afriani, Anwardi	316-322
59. A NEW MODEL MOBILE LEARNING MANAGEMENT SYSTEM BASED ON MOODLE IN UNIVERSITY Lita Sari Muchlis, Kasman Rukun, Krismadinata, Yahfizham	323-327
60. DEVELOPMENT OF MECHANICAL TECHNOLOGY LEARNING MODULE PROGRAM EXPERTISE OF SMK ENGINEERING M. Giatman, Waskito, Maruli Sihombing	328-332
61. SECURITY OF MEDICAL RECORD WITH RIVEST SHAMIR ADLEMAN (RSA) METHOD M.Syaifuddin, Ahmad Fitri Boy, Ali Ikhwan.....	333-336
62. RAHMATAN LIL ALAMIN, THE CONCEPT OF MULTICULTURAL EDUCATION Muh. Barid Nizarudin Wajdi, Achmad Fathoni Rodli	337-340

63. LESSON STUDY FOR IMPROVING A LEARNING QUALITY Muh. Barid Nizarudin Wajdi, Andi Mursidi	341-345
64. THE ROLE OF INFORMATION TECHNOLOGY IN THE IMPROVEMENT OF TEACHER'S COMPETENCIES AND TEACHING LEARNING PROCESS EFFECTIVENESS IN ESA SEJAHTERA SCHOOL PEKANBARU Muhammad Luthfi Hamzah, Hamzah, Astri Ayu Purwati	346-350
65. IMPLEMENTATION OF PROJECT BASED LEARNING MODEL IN COURSE WEB DESIGN Muhammad Sabir Ramadhan, Neni Mulyani, Muhammad Amin.....	351-357
66. MEASUREMENT MODEL OF CONTRIBUTED FACTOR AND INDICATOR TOWARDS VOCATIONAL EDUCATION PRODUCTIVITY Mulianti, Ambiyar, Generousdi and Rodesri Mulyadi	358-364
67. ORNAMENTS ON THE TRADITIONAL ACEHNESE HOUSE IN CENTRAL ACEH, ACEH PROVINCE N Novita, M Mukhirah, R Dewi, Fitriana, F Noer, F Fadillah, E Erni.....	365-368
68. DESIGNING STRATEGY MAPS FOR PRIVATE ENGINEERING COLLEGE Nanang Alamsyah, Larisang, Muhammad Ansyar Bora	369-376
69. DESIGN OF INTERACTIVE MEDIA INTERACTIVE EYE LESSONS FOR CLASS III SD N 04 BARINGIN PADANG CULTURAL CULTURAL FLOOR BASED ON MULTIMEDIA Nelda Azhar, Putra Jaya, Asrul Huda, Etika Fahmidyah	377-383
70. DEVELOPMENT OF MALAY FRUIT ORNAMENT Netty Juliana.....	384-387
71. THE CONTRIBUTIONS OF DISCIPLINE AND ENVIRONMENTAL KNOWLEDGE ON CLEAN BEHAVIOR OF STUDENTS IN PUBLIC ELEMENTARY SCHOOL KAMPUNG BARU PARIAMAN, WEST SUMATERA Nurhasan Syah, Sanny Edinov	388-393
72. ANALYSIS OF VOLUME AND STRONG CONCRETE IMPROVEMENT ON NON- SAND CONCRETE MIXED WITH ADDITION BAKING POWDER Nurmaidah	394-398
73. BRACING CROSS SECTION EFFECT TO DISSIPATION ENERGY BY NUMERICAL ANALYSIS Prima Zola, Rahmat, Fitra Rifwan	399-405
74. DEVELOPMENT OF MODEL OF PROPELLER-CROSS FLOW WATER TURBINE FOR PICO HYDRO POWER GENERATOR TITLE Purwantono, Refdinal, Hendri, Syahrul.....	406-408
75. THE POTENTIAL OF RENEWABLE ENERGY (STUDY CASE IN TOMUAN HOLBUNG VILLAGE, ASAHAN REGENCY OF SUMATERA UTARA PROVINCE) Rahmaniar, Agus Junaidi.....	409-413

76. VIRTUAL LAB IMPLEMENTATION QOS METAROUTER ON COMPUTER NETWORK LEARNING Raimon Efendi.....	414-418
77. BLASTING DESIGN DEVELOPMENT AREA DECLINE CIBITUNG AND CIKONENG UNDERGROUND MINE PT CIBALIUNG SUMBERDAYA BANTEN Raimon Kopa, Afdhal Husnuzan, Bambang Heriya.....	419-423
78. ANALYSIS OF LEARNING COMPETENCY ENGINEERING STUDENTS VOCATION D 3 FT UNP Ramli, Febri Prasetya	424-429
79. FACTORS AFFECTING THE AUTOMOTIVE ENGINEERING STUDENTS' INTEREST ON TEACHING PROFESSION Rasinov Chandra, Anggi Aprianto, Mawardi, Reza Rahmadani.....	430-435
80. AN EXPERIMENTAL STUDY ON THE EFFECT OF CENTRIFUGAL CLUTCH COOLING GROOVE ON MOTORCYCLE PERFORMANCE Remon Lapisa, Hendika Syahputra, Irma Yulia Basri, Rifdarmon, Hendra Dani Saputra	436-440
81. EXPERT MODEL SYSTEM ON ENTREPRENEURSHIP PERSONALITY Resmi Darni, Z. Mawardi Effendi and Selamat Triono.....	441-446
82. THE ANALYZED OF TAR AS WASTE MATERIAL OF BITUMINOUS COAL GASIFICATION BY USING GASCHROMATOGRAPHY Rijal Abdullah and Hengki Ade Satria	447-450
83. EMPLOYEE PRODUCTIVITY IN TWO CROSS CULTURES BASED ENTREPRENEURSHIP Riki Adriadi, Ganefri and Fahmi Rizal	451-455
84. DEVELOPMENT OF INTERACTIVE MULTIMEDIA CD OF INSTRUCTIONAL MEDIA ON BUILDING CONSTRUCTION Rizky Indra Utama, Nurhasan Syah, Rijal Abdullah.....	456-458
85. MULTIMEDIA INTERACTIVE IN WEB PROGRAMMING SUBJECTS Rusli Saputra, Sophan Sophian, Delia Putri.....	459-464
86. PREDICTED VULNERABILITY ASSESSMENT OF NON ENGINEERED HOUSES BASED ON DAMAGE DATA OF THE 2009 PADANG EARTHQUAKE IN PADANG CITY, INDONESIA Rusnardi Rahmat Putra, Junji Kiyono and Aiko Furukawa	465-472
87. TWO SPECIES OF TERMITE DAMAGING TO BUILDING AND HOUSES AT BANDA ACEH (SUMATRA, INDONESIA) S Syauckani, M Bahi, M Muslim, M Shabri Abd Majid, D Sutekad, Y Yasmin, N Novita	473-476
88. PERSONAL MANAGEMENT IN INFORMATION SYSTEMS APPLICATIONS WITH TOGAF FRAMEWORK Safrian Aswati, Saleh Malawat, Suhendra, Iskandar, Yessica Siagian, Arridha Zikra Syah	477-482

89. ANALYZING OF TECHNICAL CUTTING OF EMPTY PALM BUNCHES Safril, Dedi Wardianto.....	483-492
90. DESIGNING AND MANUFACTURE OF RADIUS PAJI HAIRERS (PAHAT RADIUS POST) ON LATHE MACHINE FOR LABORATORY AND MODULES TEACH Saiful Anwar, Rindi Genesa Hatika, B.Herawan Hayadi.....	493-498
91. MATERIAL SELECTION ANALYSIS AND MAGNET SKEWING TO REDUCE COGGING TORQUE IN PERMANENT MAGNET GENERATOR Sepannur Bandri, M. Aldi Tio.....	499-506
92. COMPARISON OF DECISION TREE ALGORITHM METHOD (C4.5) AND NAIVE BAYES TO IDENTIFY STUDENT LEARNING RESULTS WITH COOPERATIVE LEARNING MODEL Sri Restu Ningsih.....	507-511
93. ONLINE ASSESSMENT TOOLS FOR 2013 CURRICULUM BASE ON INFORMATION TECHNOLOGY Suartin, Hambali, Oriza Chandra	512-517
94. GAME BASED LEARNING TO IMPROVMENT TEACHERS KNOWLEDGE FOR TEACHING STRATEGY IN THE CLASS Suherman.....	518-523
95. LEARNING RESPONSE OF JOURNEY LEARNING COOPERATIV LEARNING AND LEARNING MODULE IN EDUCATION MEDIA LEVEL Suparno, Bulkia Rahim, Zonny Amanda Putra, Junil Adri, Jasman	524-528
96. NEED ANALYSIS APPLICATION ON THE FEASIBILITY STUDY OF THE HYDROELECTRIC POWER SELECTION (CASE IN SOLOK, PESISIR SELATAN AND SIJUNJUNG REGENCY) Suryadimal, Edi Septe, Wenny Martiana, Fahmi Rizal, Nizwardi Jalinus.....	529-534
97. DEVELOPING SOFT SKILLS LEARNING MODELFOR MECHANICAL ENGINEERING STUDENTS OF VOCATIONAL HIGH SCHOOL Suryo Hartanto	535-538
98. IMPACT OF WORK-BASED LEARNING OF CONCRETE STONE WORK PRACTICE ON DIPLOMA-III CIVIL ENGINEERING STUDENTS Syafiatun Siregar	539-543
99. DEVELOMPENT OF WEB-BASED DECISION SUPPORT SYSTEM FOR SCHOLARSHIP RECIPIENTS SELECTION USING ANALYTICAL HIERARCHY PROCESS (AHP) METHOD Titi Sriwahyuni, Dedi Irfan, Ika Pharma Dewi and Hanny Maharani.....	544-552
100. EFFECT OF ENGINE TEMPERATURE CHANGES ON INJECTION TIME OF FUEL AND GAS EMISSION OF GASOLINE ENGINE Toto Sugiarto, Dwi Sudarno Putra, Wawan Purwanto	553-557

101. EARTHQUAKE AND TSUNAMI DISASTER MITIGATION TRAINING FOR ELEMENTARY SCHOOL STUDENTS IN THE COASTAL AREA OF PADANG PARIAMAN DISTRICT WITH KYOTO INTERNATIONAL DISASTER PREVENTATION SCHOOL METHOD Totoh Andoyono, Fitra Rifwan, Revian Bodi, Prima Zola, Annisa Prita.....	558-560
102. FUNCTIONAL MEMBERSHIP ANALYSIS OF FUZZY INFERENCE SYSTEM SUGENO IN ANEMIA CLASSIFICATION Tri Monarita Johan	561-563
103. DEVELOPMENTAL OF MEDIA LEARNING BASED ON TUTORIAL VIDEO AT CHARACTER MAKE UP SUBJECT IN SMKN 6 TyasAsih Surya Mentari, MurniAstuti, and Linda Rosalina	564-570
104. PSYCHOLOGICAL FACTORS INFLUENCING THE DECISION MAKING OF PURCHASING PRODUCTS VIA ONLINE Ulfa Annida Damanik, Sri Wening	571-577
105. IMPROVING TEACHERS' PROFESIONALISM APPROPRIATE TO NEW CURRIRULUM 2017 FOR VOCATIONAL SCHOOLS BY CAPACITY BUILDING AND WORKSHOP ABOUT PREPARING LOCAL GOVERNMENT FINANCIAL STATEMENT; AN EXPERIMENTAL STUDY ON ACCOUNTING TEACHERS' FROM VOCATIONAL SCHOOLS IN WEST SUMATERA PROVINCE Vita Fitria Sari, Mayar Afriyenti, Mia Angelina Setiawan	578-585
106. THE DEVELOPMENT OF VIT (VOCATIONAL INTEREST TEST) MODEL USING DECISION SUPPORT SYSTEM (DSS) TECHNIQUE Vitriani.....	586-590
107. ANALYSING INFORMATION SYSTEM OF ACADEMIC SERVICES IN THE UNIVERSITY Wahyu Prima, Ganefri, Krismadinata	591-595
108. RESOURCE SHARING–BLENDED PROJECT BASED LEARNING (RS-BPBL©) MODEL DEVELOPMENT IN VOCATIONAL HIGH SCHOOL Wahyudi	596-602
109. DEVELOPMENT ASSESSMENT MODEL TO HIGH ORDER THINKING SKILL ORIENTATE FOR EVALUATION STUDENT COMPETENCY Wakhinuddin S, Bahrul Amin, Waskito	603-605
110. USE OF GEARBOX VIAR ON FISHING SHIPS Wakhinuddin S, Donny Fernandez, Andrizar, M Nasir, Rifdarmon	606-609
111. THE APPLICATION OF SIMPLE STRAIN GAUGE DYNAMOMETER IN LEARNING STYLE CUTTING LATHE Wenny Marthiana, Suryadimal, Edi Septe, Duskiardi, Andika	610-613
112. DESIGN OF ANDROID BASED INTERACTIVE BOOK IN INTEGRATED ISLAMIC ELEMENTATY SCHOOL OF LAN TABUR PAGARALAM CITY Yadi, Efan, Sigit Candra Setya	614-617

113. SMART CLASSROOM DESIGNS IN THE SMART EDUCATIONAL ENVIRONMENT Yasdinul Huda, B Herawan Hayadi	618-626
114. BUILD AND DESIGN OF BUSINESS INTELLIGENCE UNIVERSITY SYSTEM AS DECISION SUPPORT ACADEMIC Yaslinda Lizar, Asriwan Guci	627-636
115. SOIL STABILITY USING CEMENT PCC IN LUBUK MINTURUN PADANG, INDONESIA Yocky Syaida Adha Putra, Tengku Ahmad Fauzan Syah	637-642
116. INFLUENCE THE LEARNING STRATEGY AND ENTRY BEHAVIOR TO YIELD LEARNING BUILDING CONSTRUCTION AND DRAWING 1 OF STUDENT Yuwalitas Gusmareta, Fahmi Rizal, Nurhasan Syah.....	643-646
117. IMPLEMENTATION OF DISASTER PREPARED SCHOOL (SSB) IN WEST PASAMAN DISTRICT WEST SUMATERA PROVINCE Yuwalitas Gusmareta, NurhasanSyah, Laras Andreas Oktavia, RizkyIndraUtama, MuviYandra.....	647-649
118. USING MOBILE TELECOMMUNICATIONS -2000 INTERNATIONAL FOR ANALYZING TECHNOLOGY NETWORK ERA 4G-LTE ZulhamSitorus, Ganefri, NizwardiJalinus	650-653
119. FACTORS AFFECTING STUDENTS IN CHOOSING COMPUTER ENGINEERING DEPARTMENT IN STT PAYAKUMBUH Zulkifli, Dilson, Rahmad Al Rian	654-659
120. FACTORS EFFECTING ELEMENTARY SCHOOL TEACHER READINESS ON IMPLEMENTING CURRICULUM IN WEST SUMATERA Zuryanty, Hamimah, Mulyani Zein.....	660-665

THE INFLUENCE OF USING ANIMATION MEDIA AND LEARNING MOTIVATION TOWARD LEARNING RESULTS OF AUTOMOTIVE STUDENTS IN SMK N 2 PAYAKUMBUH

Indra Wahyu¹, Fahmi Rizal², Rijal Abdullah³
Faculty of Engineering,
Universitas Negeri Padang, Indonesia

Abstract: This article was written to describe: (1) The difference result of students learning on TDO Subject between by Using Animation Media and not Using Animation Media, (2) The difference result of students learning on TDO Subject between the students who have high motivation and low motivation, (3) The interaction between learning Using Animation Media and learning motivation toward the Result of TDO Subject. The type of this research quasiexperimental design with total population is 4 classes by the number of student are 124 students. Selected sample are 2 classes were composed of experimental class and control class. The results of hypothesis testing showed that: (1) there are differences in learning result TDO students who used on-media animation with media animation, which shows that the learning result of students who use higher animated media, (2) there are differences learning result between the students who have high motivation and low motivation, it shows the students who have high motivation better than the students who have low motivation (3) There is interaction of Using Animation Media and learning motivation toward TDO Subject on The first term in learning periode 2014/2015, with probability 0.014.

Keyword: Animation Media, Learning Motivation, Learning Result

1. INTRODUCTION

Learning is an activity that deliberately done to modify the various conditions directed to achieve a learning objective. Learning is a process of changing behavior both in terms of cognitive, affective and psychomotor aspects. The learning process is influenced by internal factors and external factors. Internal factors derived from the learners themselves include interest, desire and learning skills. While the external factors such as teachers and all the strategies. In teacher learning process is the main key, hence teachers are demanded always to do learning innovation covers discovery and utilization of media, classroom management and set learning strategy well.

Motivation learning that comes from internal and external learners is the basic capital to achieve learning outcomes. While the activities undertaken learners in learning is a process to achieve learning outcomes. In the learning process, learning outcomes can be regarded as the product of the learning process. Learning outcomes will be optimal if supported by a strong motivation. The more appropriate the given motivation, it will further support the increase in the activities of learners on the desired goals. Motivation and activities undertaken by learners will determine the intensity of effort achievement of learning outcomes.

Learning outcomes are the basis for determining the level of success in understanding a subject matter. The quality of learning can be seen

from two aspects, namely in terms of results and learning process. In terms of learning outcomes, learning is said to succeed if learners have mastered the competencies learned at least reach the Minimum Criteria of Completeness (KKM) on each of these competencies. In terms of the learning process, learning is said to succeed if 85% of learners are actively involved (SMK N2 Payakumbuh Curriculum, 2013).

Basic Technology of Automotive (TDO) is one of the basic subjects of vocational in Automotive Engineering Program that must be completed, given in semesters 1 and 2 in class X students. Learning materials contained TDO subjects include: material about the basics of the machine, metal formation, and energy conversion machines. Low learning outcomes in TDO subjects will affect students' learning outcomes in other vocational competencies, sourced from TDO subjects.

Based on observations and information obtained from teachers who teach TDO subjects in SMK N 2 Payakumbuh, obtained data that part scores of student learning outcomes are still low. This means that the absorption or the level of mastery of learners against the TDO subjects is still far below the minimum mastery level. This is evidenced from the pure achievement of the average grade of semester test for students of class X Automotive Engineering in TDO subjects in the first semester of the academic year 2013/2014, there are still many learners who have not achieved

the learning achievement of Minimum Exhaustiveness Criterion (KKM).

When observed in the learning activities of students class X Automotive Engineering SMK N 2 Payakumbuh, generally illustrated the lack of competence in learning, impact on the achievement of learning results are not satisfactory. This can be observed from some of the learner's lack of presence, less responding to teacher questions, gathering tasks not on time, not following the lesson seriously, disturbing friends, leaving the classroom before the learning process ends. To know the condition of learning and data of characteristic of learners on Basic Subject of Basic Automotive Technology, then conducted an interview with the subject teacher. From the results of interviews can be concluded that: teachers are still teaching conventionally, the influence of friendship environment of friends that cause them do not want to go on time, the tendency of teachers to use the same method of presentation so that the lesson material becomes unattractive, learners feel less involved in learning, and the way the teacher conveys the less understood learners

There are three purposes in this research are: (1) reveal the influence of the use of animation media in improving learning outcomes in the subjects of TDO students SMK N2 Payakumbuh, (2) reveal the influence of learning motivation on the learning outcomes TDO subjects of students SMK N2 Payakumbuh, 3) reveal the interaction between learning media and learning motivation in influencing learners' learning outcomes on TDO subjects

2. RESEARCH METHODS

This research is a type of experimental research by implementing instructional media in the form of Macromedia flash animated animation (utilization media). The experiment used in this research is quasi-experiment (Quasi-experiment). The design/design of this research uses a factorial design

This study was conducted to determine the causal relationship of a treatment, namely to see the students' learning outcomes in the TDO subjects on basic competence explains the process of energy conversion machine after using the animation media

The instrument used in this study is a test question to determine the results of learning Basic Automotive Technology and questionnaire motivation learners. The difference of learning result of Basic Technology of Automotive learners between the experimental group and the control group was tested with independent t-test to determine the effect of using animation media on learning outcomes. To know motivation learners

after learning using animation media, through the data score questionnaire provided by learners. The treatment in this research is an experiment in learning using animation media for experiment class and without using animation media for conventional class. Each treatment group made the same learning design, except on the media used. This research instrument is a tool that can collect data about TDO learning outcomes in the cognitive domain, covering aspects of knowledge, understanding, and application. The test is given in the form of writing form of multiple choice (PG) with the number of questions as many as 40 items.

The question items in this instrument were developed starting from composing the question grid that was consulted with the expert judgment for the validation of the learning result test. After validation, the next test is done. Tests conducted on 32 respondents, outside the object of research. The test result of learning is tried to know the validity of the item, the reliability of the item, the difficulty index of the problem, the different power and the function of the permit. Ambiyar (2012: 149) states that the analysis of the items on the test of learning outcomes can be done from three aspects, namely: (1) the difficulty of the problem points, (2) the differentiating points of the questions, and (3) the distractor functional aspects. Of the 40 questions, there are 35 items that are declared valid and 5 items are invalid (fall). Based on data processing experimental variable learning outcomes performed, the obtained reliability index of 0.879 this shows the reliability index test index is at a high level.

2.1 Data Analysis Technique

After getting an overview of the mean, standard deviation, highest score, lowest score and range of score. The result data were analyzed by (a) Normality test to see whether the data is normally distributed, (b) homogeneity test aims to see both samples having a homogeneous variance or not. For data of more than two groups of data then the homogeneous test can be used is Barlett test. The data in this study were analyzed to test the research hypothesis. Testing of the first and second hypothesis is done by t-test.

3. RESULTS AND DISCUSSION

The research data collected in this research comes from class X TPBO as an experimental class and class X TSM as a conventional class at SMK N 2 Payakumbuh. The questionnaire data of motivation scores and the learning result test obtained overall reveal information about the highest score, lowest score, average, standard deviation, and variance.

The result of this learning motivation questionnaire is distinguished from the experimental class that gets treated by using animation learning media and conventional class (without using animation learning media). The highest questionnaire value is 193, which shows that learners have a high learning motivation during the TDO learning process takes place. The result of questionnaire motivation learners learn good class experiment and conventional class can be described. For the highest score in the motivation, a questionnaire was found in the experimental class with the score 193 and the conventional class was at score 188. In the experimental class had a mean of 169,5 and the conventional class of 156. From the data collected for learning motivation of learners in the experimental class in the group high

motivation has to mean with score 179,7 and for low motivation with score 148. For conventional class have meant in high motivation group with a mean of 168,9 and low motivation with a mean of 143,1.

3.1 Hypothesis Testing Results

3.1.1 First Hypothesis Test

The first hypothesis states the results of learning TDO learners who are taught with animation media learning is higher than the learning outcomes of learners who are taught conventionally. To test the hypothesis was analyzed by t-test, with results as shown in table 5.

Table 5. Results of the First Hypothesis Testing Calculation

		Independent Samples Test									
		Levene's Test for Equality of Variances		t-test for Equality of Means							
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference		
										Lower	Upper
Learning outcomes TDO	Equal variances assumed	1.934	.170	2.458	58	.017	8.300	3.377	1.541	15.059	
	Equal variances not assumed			2.458	55.539	.017	8.300	3.377	1.535	15.065	

Based on table 4:15, it appears that t arithmetic for learning outcomes with Equal Variances not assumed is 2.458 with a probability of 0.017. For the two-tailed test, the probability becomes $0.017 / 2 = 0.0085$. Because $0.0085 < 0.025$ then Hypothesis zero (H0) states that the results of learning TDO among learners who are taught by using animation media together with learners who conventionally taught (without using the media animation) are rejected. Alternative hypothesis (H1) accepted that states that there are differences in learning outcomes of learners who are taught using animation media with students who are taught conventionally (without using animation media).

This indicates that there are differences in learning outcomes of TDO learners taught by using animation media (A1) with students taught conventionally (A2) thus learning using better animation media and can improve TDO learning outcomes

3.1.2 Second Hypothesis Test

The second hypothesis states the learning outcomes of TDO learners who have higher motivation higher than learners who have low motivation. To test the hypothesis was analyzed by t-test, with results as shown in table 6.

Table 6. Second Hypothesis Test Results

		Independent Samples Test									
		Levene's Test for Equality of Variances		t-test for Equality of Means							
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference		
										Lower	Upper
Learning outcomes TDO	Equal variances assumed	4.654	.045	6.496	18	.000	23.200	3.571	15.697	30.703	

		Independent Samples Test				t-test for Equality of Means				
		Levene's Test for Equality of Variances						95% Confidence Interval of the Difference		
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	Lower	Upper
Learning outcomes TDO	Equal variances assumed	4.654	.045	6.496	18	.000	23.200	3.571	15.697	30.703
	Equal variances not assumed			6.496	13.955	.000	23.200	3.571	15.538	30.862

Based on table 6, it appears that t arithmetic for learning outcomes with Equal Variances not assumed is 6.496 with a probability of 0.000. For a two-tailed test, the probability becomes $0,000 / 2 = 0,000$. Because $0,000 < 0,025$ then Hypothesis zero (H0) states that the results of learning TDO among learners who have high motivation with low-motivated learning outcomes are rejected. The alternative hypothesis (H1) accepted states that the learning outcomes of learners who have high motivation higher than those with low motivation. This indicates that there are differences in learning outcomes of TDO learners who have the high motivation (B1) with students who have the low

motivation (B2) thus learners who have higher motivation better and can improve the results of learning TDO

3.1.3 Third Hypothesis Test

The third hypothesis states that there is a learning interaction between learning media and learning motivation in influencing student learning outcomes on TDO subjects. To test the hypothesis was analyzed with ANOVA Two-Lane, the results as shown in table 7.

Table 7. Hypothesis Testing Results

Tests of Between-Subjects Effects						
Dependent Variable: The Results Of The Study						
Source	Type III Sum of Squares	df	Mean Square	F	Sig.	
Corrected Model	2403.533 ^a	3	801.178	5.227	.003	
Intercept	317699.267	1	317699.267	2072.789	.000	
Media_Pembelajaran	1401.667	1	1401.667	9.145	.004	
Motivasi_Belajar	9.600	1	9.600	.063	.803	
Media_Pembelajaran * Motivasi_Belajar	992.267	1	992.267	6.474	.014	
Error	8583.200	56	153.271			
Total	328686.000	60				
Corrected Total	10986.733	59				

a. R Squared = ,219 (Adjusted R Squared = ,177)

Based on table 7, it is seen that F arithmetic is 6.474 with probability 0.014. Because of the probability of $0,014 < 0,05$, the null hypothesis (H0) states that there is no learning interaction between learning outcomes taught by using animation media and learning motivation of learners on TDO subjects rejected. While alternative Hypothesis (H1) accepted that states that there is a learning interaction between learning outcomes taught by using animation media and learning motivation of learners on TDO subjects. The average score graph of the learning outcomes of the two treatment groups as shown in Figure 2.

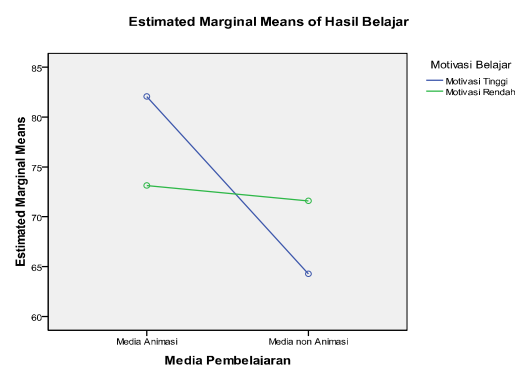

Figure 2. Graph of the average score of learning outcomes of both treatment groups In Figure 2. The graph shows the picture that the score of the result of the students' learning that is taught by the animation media is higher than the non-animated media (conventional). On the graph saw a disordinal interaction between learning using animation media with the level of learning motivation. This is explained by the intersection by the low motivation line on learning using animation media to cut the high motivation line on learning using non-animated media (conventional)

4. DISCUSSION

a. Learning outcomes of TDO learners are taught with animated learning media compared to the learning outcomes of students taught conventionally (without using animation media). The results of the first hypothesis testing, based on t-test analysis showed that overall learners who follow the learning by using the animation media showed higher TDO learning outcomes than the learning of learners without using animation media, which obtained data as shown in table 8

Table 8. Experiment Class and Conventional Classroom Data

No.	Data	Experiment Classroom Learning Results	Conventional Classroom Learning Outcomes
1.	Mean	77	69
2.	Median	75,50	56,00
3.	S ²	133,39	207,70
4.	S	11,55	14,41

From table 8 shows the value for the experimental class above the KKM school that is 75, the conventional class under the KKM is worth 69. While the standard deviation is obtained for the experimental class 11.55 and for the conventional class 14.41. This study is supported by the theory that the media animation can enhance the learner's activity. As Munir (2012: 61), with the animation media strengthen learners' understanding of learning materials so as to improve student learning outcomes.

According to Hamalik (2012: 238) learning by using media animation more communicative and interactive. Proven when the research appears the learners are more centralized and curiosity is higher to learn the material because they feel interested and motivated will be the presentation of media. Thus it can be concluded that to improve learning outcomes learners need to use animation media as a supporter of learning.

a. TDO learning outcomes of learners who have high motivation compared with the results of learners who have low motivation. The second

hypothesis test result, based on t-test analysis shows that the TDO learning outcomes of high motivated learners is higher than the learning outcomes of learners who have low motivation. Learners should have high motivation to improve learning outcomes. Gellerman (1963) says that people who have high achievement motivation, would love to win a competition. He dared to bear all the risks as a consequence of his efforts to achieve the goal. Timpe (1993: 221) says that motivation is the desire of someone who encourages him to perform actions that can be seen from the sincerity and joy of the work and done with full responsibility. Things are not much different proposed by Moekijad (1990), and Nawawi (1993) who said that, motivation is a human impulse to do something to achieve goals. Based on the study of theory and the results of data analysis can be concluded that to improve learning outcomes of learners they must have high motivation

b. Interaction between learning media and learning motivation of learners on TDO subjects. Based on the results of the analysis with Anova Two Path, the test results prove there is an interaction between the learning media Animation with the level of motivation of learners in influencing the results of learning TDO. Interaction is a dependency relationship between a variable to some extent from other variables. Result of analysis of third hypothesis test, it can be concluded that there is interaction between animation media with motivation level of learners in influencing learners result of learners or hypothesis presented accepted. This means that this stage of learning results TDO learners who are taught by animation media can improve student learning outcomes. In graph 4.9 seen the interaction disordinal between learning using animation media with the level of learning motivation. This is explained by the intersection by the low motivation line on learning using animation media to cut the high motivation line on learning using non-animated media (conventional). According Kerlinger (2000: 351) states that the variety of interactions with crossed patterns called interaction disordinal. While the interaction with the inline pattern is the independent variable effective one level of other independent variables called ordinal interaction. Interaction is not always the result of a "true interaction" between experimental treatments. There are three possible causes: (1) the variant induced by the actual interaction between the two variables together affects the dependent variable, (2) the occurrence of an accidentally arising interaction, and (3) the effect or effect working on one experimental level, but not working at another level of experiment.

The presence of interaction between animation media with the level of motivation of learners in

influencing the learning result of TDO due to several things, among others: a. The animation media used in this study is an existing media group or media so (Media By Utilization) that is projected motion media, meaning that the show visualizes the workings of a tool accompanied by sound by displaying the program output containing learning materials with interesting pictures accompanied by sound. Learning by using multiple senses, ie the sense of view and hear will provide benefits for learners. The success in learning from what we hear is only 20%, what is heard and see 50%. (Yulaelawati, 2004: 121). This means believed by the media of learning animation will be more meaningfully obtained learners. b. In this animated media if the learners do not understand can play back the animation outside the lesson, meaning learning can be done repeatedly with ease and efficiency.

c. The animation media used can display things that are not visible (abstract). For example the visualization of the combustion process in the combustion chamber. It is believed that understanding of learning messages using animation media is more meaningful, starting from the diffrensiasi phase that learners initially observe, identify and analyze. Furthermore, in the conclusion phase of learners through visualization experience is believed to be able to create a new conceptualization of what they learned before. Evidently, the use of animation media can: 1) overcome the limitations of space, time and sense power, 2) appropriately and varied can overcome the students' facial attitude, so the media can cause excitement in learning (Sadiman, 2008: 17).

Thus it can be concluded that the animation media implemented in this study is the right media in improving the results of learning TDO students class X TPBO in SMK N 2 Payakumbuh

5. CONCLUSIONS AND RECOMMENDATIONS

Based on the results of data analysis and discussion, it can be concluded that: (1) Learning outcomes using animation learning media better than conventional or without animation media learning. (2) Results TDO learners who have high motivation higher than the results of learning learners who have low motivation.(3) There is a significant interaction between the use of animation learning media with the learning motivation of

learners in influencing student learning outcomes on TDO subjects. It is suggested to the Headmaster to encourage teachers to choose the animation media in delivering the lesson material effectively and pay attention to the availability of supporting facilities and infrastructure, including the availability of computers and in-focus in schools. For further researchers it is expected to use more complete instruments and design an integrated animation learning media on the learning objectives in the curriculum. In addition, for teachers who teach TDO subjects should diligently integrate several learning methods. In the activities of mentoring, development, and management of teacher learning activities certainly can facilitate learners so motivated in achieving learning objectives. It is expected that the appropriate and varied media use can overcome the passive attitude of learners
