PROCEEDINGS
4th International Conference on Technical and Vocational Education and Training (TVET)

Theme: Technical and Vocational Education and Training for Sustainable Societies

General Chair:
- Prof. Ganefri, Ph.D. (Rector Universitas Negeri Padang)

Program Committee Chair:
- Dr. Fahmi Rizal, M.Pd., M.T. (Dean Fakultas Teknik Universitas Negeri Padang)

Steering Committee:
- Prof. Dr. Nizwardi Jalinus, M.Ed. (Universitas Negeri Padang, Indonesia)
- Prof. Dr. Ali Ghufron Mukti, M.Sc., Ph.D. (Direktorat Jenderal Sumber Daya Ilmu Pengetahuan Teknologi Pendidikan Tinggi Kementrian RISTEKDIKTI)
- Prof. Dr. David Stein, Ph.D. (OHIO State University, USA)
- Prof. Junji Kiyono (Tottori University, Japan)
- Prof. Maizam Alias, Ph.D. (UTHM, Malaysia)
- Prof. John Williamson, Ph.D. (University of Tasmania, Australia)
- Prof. Selamat Triono Ahmad, Ph.D. (Universitas Negeri Medan, Indonesia)
- Dr. Rijal Abdullah, M.T. (Universitas Negeri Padang, Indonesia)
- Drs. Hambali, M.Kes. (Universitas Negeri Padang, Indonesia)
- Drs. Hanesman, MM. (Universitas Negeri Padang, Indonesia)
- Dr. Ir. Arwizet K, ST., MT. (Universitas Negeri Padang, Indonesia)
- Drs. Martias, M.Pd. (Universitas Negeri Padang, Indonesia)
- Drs. Raimon Kopa, MT. (Universitas Negeri Padang, Indonesia)

Scientific Committee:
- Prof. Sai Vanappali (University of Ottawa, Canada)
- Prof. Junji Kiyono (Tottori University, Japan)
- Prof Maizam Alias, Ph.D. (UTHM, Malaysia)
- Prof. Jailani Mhd. Junos, Ph.D. (UTHM, Malaysia)
- Prof. Dr. Nizwardi Jalinus, M.Ed. (Universitas Negeri Padang, Indonesia)
- Ir. Syahril, ST., MSCE., Ph.D. (Universitas Negeri Padang, Indonesia)
- Prof. Dr. Kasman Rukun, M.Pd. (Universitas Negeri Padang, Indonesia)
- Prof. Dr. Ing. I Made Londen B (Institut Teknologi Sepuluh November Surabaya)

Reviewer:
- Prof. Dr. Nizwardi Jalinus, M.Ed.(Universitas Negeri Padang, Indonesia)

FOREWORD

Welcome for all respected scholars, researchers, post graduate students and especially Keynote Speakers to the 4 ICTVET. The theme of the conference focuses on Technical and Vocational Education and Training for sustainable societies and consist of six subthemes. i.e Development of learning model on TVET, Workplace Learning and entrepreneurship, Innovation on applied engineering and information technology, Management and Leadership on TVET, Vocational and Technical Teachers education, and Assessment and Evaluation on TVET.

Sustainable society should be followed by the improvement of various factors that have impacts to the quality of vocational and technical education and training, particularly to overcome the competitiveness of the world business. As we have already known the rapid change of technology as well as the change of demography, having a great effects to the life of peoples in this world. The competitiveness need a collaborativeness to survive the life of millions peoples who lost their jobs. Young peoples as a productive generation have to be creative and innovative to face the competitiveness. So this proceeding contents consist of various findings of research in the field of vocational and technical education as well as applied technology and mainly based on the subthemes of the conference.

Finally, we would like to thank a million for all participants of this conference and all parties who support the success of this conference. Hopefully the seminars and scientific work of this seminar can be a reference material for basic education and elementary school teacher education in Indonesia.

Padang, July 2, 2018

Tim Editor
1. THE PROSPECT OF OFFSHORE IRON SAND IN TIRAM BEACH PADANG
PARIAMAN REGENCY WEST SUMATERA
Adree Octova, Ansosry, Yoszi Mingsi Anaperta and Indah Elok Mukhlisah............... 1-7

2. OPTIMIZE OF LEAST-SQUARE INVERSE CONSTRAIN METHOD OF
GEOELECTRICAL RESISTIVITY WENNER-SCHLUMBERGER FOR
INVESTIGATION ROCK STRUCTURES IN MALALAK DISTRICTS OF AGAM
WEST SUMATRA
Akmam, Amir Harman, Putra Amali................................................................. 8-13

3. CLUSTER ANALYSIS DISTANCE INTER DISTRICT USING SINGLE LINKAGE
METHOD FOR DETERMINATION OF MPLIK CAR OPERATION ZONE IN MEDAN
CITY
Ali Ikhwan, Yasmin Mohd Yacob, Solly Aryza ................................................. 14-16

4. EFFECT OF MIND MAPPING LEARNING METHODS ON LEARNING OUTCOMES
Almasri .................................................................................................................. 17-21

5. DESIGN OF SKILL ASSESMENT IN COMPUTER NUMERICAL CONTROL
PROGRAMMING SUBJECT
Ambiyar, Febri Prasetya, Yufrizal......................................................................... 22-26

6. MODIFICATION OF INPUT PUSHER ASSEMBLY OF LASER MARKING MACHINE
Arif Rahman Hakim .............................................................................................. 27-34

7. COLLABORATIVE PROJECT-BASED LEARNING: AN INSTRUCTIONAL DESIGN
MODEL IN THERMODYNAMICS ON TECHNICAL VOCATIONAL EDUCATION
AND TRAINING (TVET)
Arwizet K, Nizwardi Jalinus, Krismadinata.......................................................... 35-39

8. DEVELOPMENT OF EMPLOYEE INFORMATION SYSTEM-BASED WEB IN MAN 1
PADANG
Asrul Huda, Rendy Harisca.................................................................................. 40-46

9. DECISION SUPPORT SYSTEM (DSS) WITH WP AND MFEP METHODS IN
SELECTION OF BEST BABY CLOTHES
Asyahri Hadi Nasyuha, Rahmat Sulaiman Naibaho, Saniman................................. 47-53

10. IMPROVING LEARNING MOTIVATION THROUGH IMPLEMENTATION
PROBLEM SOLVING LEARNING STRATEGY
Budi Syahri, Primawati, Syahrial ........................................................................... 54-58

11. THE MODELING OF MASSIVE LIMESTONE USING INDICATOR KRIGING
METHOD (CASE STUDIES OF MASSIVE LIMESTONE IN PT SINAR ASIA
FORTUNA)
Dedi Yulhendra, Yoszi Mingsi Anaperta .............................................................. 59-65

12. ELECTRONIC COMPONENT TESTER AS A LEARNING MEDIA FOR CLASS X
STUDENTS AUDIO VIDEO ENGINEERING SMKN 1 SUMBAR
Delsina Faiza, Thamrin, Ahmaddul Hadi, Yongki Saputra..................................... 66-74
13. EFFECTIVENESS OF INTERACTIVE INSTRUCTIONAL MEDIA ON ELECTRICAL CIRCUITS COURSE: THE EFFECTS ON STUDENTS COGNITIVE ABILITIES
Doni Tri Putra Yanto, Sukardi, Deno Puyada ................................................................. 75-80

14. EVALUATION OF LEARNING PROCESS USING CIPP MODEL
Dwi Sudarno Putra, Misra Dandi Utama, Dedi Setiawan, Remon Lapisa, Ambiyar ........... 81-86

15. IMPLEMENTATION OF CONTEXTUAL TEACHING AND LEARNING ON ANALYZING ELECTRICAL CIRCUITS SUBJECT
Dwiprima Elvanny Myori, Citra Dewi, Eruta Astrid, Ilham Juliwardi ............................... 87-91

16. DOMESTIC EMPLOYMENT PROCESSING SYSTEM ON WORKING PROTECTION AND TRANSMIGRATION USING GEOGRAPHIC INFORMATION SYSTEM (GIS)
Eddis Syahputra Pane, Kori Cahyono ................................................................. 92-98

17. CONDUCTING LABOR MARKET ASSESSMENT IN ENGINEERING CURRICULUM DEVELOPMENT
Edi Septe, Suryadimal, Wenny Marthiana, Nizwardi Jalinus, Ramli ......................... 99-105

18. DIFFERENCES IN LEARNING OUTCOMES IN THE PRACTICE OF MICROCONTROLLER SYSTEM USING MCS51 MICROCONTROLLER TRAINER KIT
Edidas, Dedy Irfan ........................................................................................................ 106-108

19. MICROCONTROLLER SKILL TRAINING FOR SMKN 2 PAYAKUMBUH AND SMKN 1 SUNGAI RUMBAI
Edidas, Legiman Slamet and Ilmiyati Rahmy Jasril .................................................. 109-113

20. THE EFFECT OF ISLAMIC WORK ETHICS AND SPIRITUAL LEADERSHIP ON EMPLOYEE’S COMMITMENT IN PADANG SHARIA HOTELS
Eka Mariyanti, Rasidah Nasrah .................................................................................. 114-120

21. THE DESIGNING OF THE PROTOTYPE OF THE AIR QUALITY MEASURING HELMET
Eko Hariyanto, Solly Ariza Lubis, Zulham Sitorus, M. Iqbal ....................................... 121-124

22. REVIEW DEVELOPING OF PROJECT BASED AS INNOVATION INSTRUCTIONAL
Eko Indrawan ........................................................................................................... 125-130

23. IMPROVING THE ESP STUDENTS’ VOCABULARY BY USING PICTURES IN CIVIL ENGINEERING STUDY PROGRAM AT FIRST SEMESTER OF EKASAKTI UNIVERSITY PADANG
Elda Martha Suri ......................................................................................................... 131-133

24. INTEGRATED SERVICES SYSTEMS ELECTRONIC DEVELOPMENT FACULTY OF ENGINEERING PADANG STATE UNIVERSITY BASED ON JAVA DESKTOP
Elfi Tasrif, Asrul Huda ............................................................................................. 134-137

25. THE EFFECT OF STRATEGY OF TRAINING MODELS IN LEARNING ELECTRICAL INSTALLATION
Elfizon, Syamsuarnis, Oriza Candra ........................................................................... 138-141
26. SOFTWARE DEVELOPMENT OF CONCENTRATION SELECTION WITH INTEREST TEST BASED ON INTELLIGENT SYSTEM
Elin Haerani ................................................................. 142-149

27. NEEDS ANALYSIS ON INCREASING COMPETENCY TEST RESULTS STUDENTS IN S1 PROGRAM OF PUBLIC HEALTH SCIENCESSTIKES HANG TUAH PEKANBARU
Emy Leonita, Nopriadi, Ahmad Satria Efendi, and Niswardi Jalinus ..................... 150-155

28. THE READINESS OF STUDENT TO ENTREPRENEUR THROUGH INCORPORATION OF THE PILOT PROJECT PRACTICE
Ernawati ........................................................................... 156-161

29. EFFECT OF PROJECT BASED LEARNING MODEL IN IMPROVING STUDENT LEARNING RESULT
Erwinsyah Simanungkalit ...................................................... 162-166

30. DESIGNING LEARNING TOOLS BY USING PROBLEM BASED INSTRUCTION (PBI) MODEL ON ENERGY RESOURCE MATERIAL INTEGRATED TO ENERGY SAVING CHARACTER
Estuhono ........................................................................... 167-170

31. THE DESIGN OF LECTURER PERFORMANCE EVALUATION MODEL BASED ON ANALYTIC NETWORK PROCESS (ANP)
Fenny Purwani, Nizwardi Jalinus, Ambiyar ............................................................... 171-175

32. DEVELOPMENT OF ONLINE EXAMINATION SYSTEM USING WONDERSHARE QUIZCREATOR BASED ON WEB
FitriYanti, Rijal Abdullah, Krismadinata ................................................................. 176-180

33. THE VALIDITY OF TRAINER ON MATERIALS SCIENCE AND DEVICES SUBJECT AT DEPARTMENT OF ELECTRICAL ENGINEERING
Fivia Eliza, Dwiprima Elvanny Myor, Hastuti ............................................................. 181-185

34. TRAINING MODEL-BASED KNOWLEDGE MANAGEMENT SYSTEM FOR VOCATIONAL HIGH SCHOOL TEACHERS SKILLS ENGINEERING COMPUTER NETWORK
Gunawan Ali, Kasman Rukun, Syahril ................................................................. 186-193

35. FUZZY LOGIC BASED CONTROLLER FOR BUCK CONVERTER
Habibullah, Irma Husnaini, Asnil ........................................................................... 194-200

36. A NEW DESIGN OF HANDLESS STIRRED DEVICE
Hanne Aulia, Riki Mukhaiyar ............................................................................. 201-204

37. ACADEMIC INFORMATION SYSTEM OF STIKES PERINTIS PADANG
Harleni, Marisa ......................................................................................... 205-209

38. DESIGN OF ELECTROMAGNETIC REGENERATIVE SHOCK ABSORBER AS A TOOL OF HARVESTING VIBRATION ENERGY ON VEHICLE
Hasan Maksum, Aslimeri, Putra Jaya, Wanda Afnison ........................................... 210-213

ABSTRACT: West Sumatra as a common area shaken earthquake, the construction of buildings both as shelters, shophouses, and other social buildings need to be built with earthquake safe concrete construction. Concrete construction is the best choice, because the material constituent relatively large, and the price is relatively cheap in West Sumatra. This study aims to increase the compressive strength of concrete with low cost. The experimental approach was chosen by experiment method that is the addition of Sunua sand material to the concrete mixture ranging from 5%, 10%, 15%, 20%, 25% and 0% for the control concrete. From the result of concrete compressive test after 28 days old with addition of Sunua sand at 5% percent = 44.20 MPa, for 10% = 48.29 MPa, for 15% = 49.62 MPa, for 20% = 44.00, for 25 % = 401.37 MPa, and the control concrete is 417.46 MPa. So the highest concrete strength is obtained at 15% percentage with power 49.62MPa.

Keywords: Increased, concrete strength, Sunua sand

A. Preliminary

Development of science and technology at the end of this century so rapidly, even become the main characteristic of human life. Only qualified human beings, capable of developing, science and technology properly, continuous human resource development will be able to deliver people to cultivate and utilize existing natural resources, to meet the needs of decent and comfortable living.

The necessity of a life of one of the buildings and infrastructures which is considered vital by a country, such as housing, office building or education. Therefore needed a creativity in creating construction creations by doing construction engineering that is simple and fundamental. However, in the engineering of this construction, it should be noted also how the safety and feasibility of such engineering in the construction engineering of a building, such as concrete used for mixing the columns, sloof, beams and floors, should be carried out without leaving any security factor.

Concrete is the main material used in construction work. In order to design the strength of the concrete well, it must meet the criteria of economic aspects that is low in cost and meet the technical aspects of meeting the strength of the structure. Aggregate is a concrete-forming material having the greatest composition in a concrete mixture. The arrangement of aggregate items is one of the most important aspects of improving the quality of concrete. For fine aggregates (sand) on concrete mixtures are generally less fine grains due to drift with water, while in order to obtain a higher compressive strength required fine particle size in order to increase the density of the concrete mixture.

Sunua Sand is a sand located in Sunua Beach, Pariaman, West Sumatra. This sand has fine grains, high specific gravity and has iron content. Therefore, researchers want to raise research with the title: "Increase the compressive strength of concrete with the addition of sunua sand"

B. Research Methodology

This research is done through experimental method approach, where there are six types of composition developed, the first type is made of concrete without added materials or called control concrete, while the other type of composition successively use added materials of sunua sand each 5%, 10 %, 15%, 20% and 25%. Through this experimental method found the most appropriate trend of addition to the highest strength of the baton. The place of research is done in Civil Engineering Building Materials Laboratory of the State University of Padang.

C. Results and Discussion

Prior to the manufacture of specimens, it is necessary to test aggregate characteristics, it is intended that the aggregates used in accordance with SNI standards or requirements governing the feasibility of aggregates are used since the aggregate characteristics affect the strength and properties of the test specimen itself. In this
The research aggregates tested were split, sand, and Sunua sand. Sunua sand is taken from Sunua Padang Pariaman beach sand while other aggregates come from Lubuk Alung Padang. The following test results of aggregate characteristics:

CONCRETE WITH SUNUA SAND ADDITIONAL MATERIALS
D. Discussion

Based on the results of concrete compressive strength testing with the addition of Sunua sand at age 28 days obtained variation of the results of 5 variations of different test objects, obtained a good compressive strength. The material used in this test is split, sand, and Sunua sand. Inspection of this material is done to ensure the material meets the standards in the manufacture of concrete. From the results of examination of the material that has been done, for the level of sand slurry, Sunua sand, and gravel shows the value of 1.99%, 0.43%, and 0.9%. These results show good results because the maximum standard requirement is 5%. For the weight of loose contents, Sunua sand, and gravel obtained values of 1.15 kg/l, 1.99 kg/l and 1.39 kg/l, while for the solid content weight of 1.55 kg/l, 2.05 kg/l and 153 kg/l. These results still include a minimum standard of 1.2 kg/l despite the weight value of loose contents sand is only 1.15 kg/l, but the value is not too far from the standard requirements. The results of testing the specific gravity of sand, Sunua sand and gravel are 2.98, 3.84 and 2.303. These results qualify at least 2.3. For the test of real dry absorption value of 5.06%, 1.06%, 4.83%, while the absorption of SSD result is 3.43%, 0.99%, and 1.27%. The maximum standard requirement for absorption is 5%. Aggregate wear with Los Angeles's engines showed 22% yield. The results are excellent because the aggregate wear standard is <40%. Then it can be concluded that the material that has been tested can be used as a mixed material of porous concrete making as it meets the requirements of the standard specified in SNI.

After examination of the material then made the manufacture of test specimens. The compressive strength of concrete is done after 28 days of concrete. Based on concrete compressive strength concrete with Sunua sand content of 15% has the highest average compressive strength that is 496.17 Kg/cm². If the concrete control is compared with the concrete with Sunua sand content of 15%, it can be seen that there is an increase of compressive strength from 417.46 Kg/cm².

E. Conclusion

After doing research of concrete with the addition of Sunua sand, hence the influence of addition of Sunua sand as material added to the concrete mix with percentage 5%, 10%, 15%, 20% and 25% obtained best concrete quality found in concrete with Sunua sand content 15% of 496.17 Kg/cm². Based on these data it can be concluded that the addition of Sunua sand to the concrete mixture can improve the quality of concrete from the concrete control.

F. Suggestions

Based on the tests that have been done, the testers suggest that better concrete manufacture plus finely graded sand like Sunua sand. Smooth grains on Sunua sand can reduce pores in the concrete. Because the number of pores on the concrete can cause the low quality of concrete and also can cause concrete porous. Therefore with the addition of finely graded sand can produce a compressive strength better.

G. Bibliography
