

ABSTRACT

Atikah Rahmah Nasution. 2021. "The Relationship between Parents' Attention and Learning Motivation with Vocational School Student Career Planning". Thesis. Faculty of Education, Universitas Negeri Padang.

This research is motivated by a phenomenon that occurs in the field, namely the low preparation of students in career planning. Parents attention and learning motivation are factors that are thought to influence career planning. This study aims to analyze: (1) parents attention, (2) learning motivation, (3) career planning, (4) the relationship between Parents attention and career planning, (5) the relationship between learning motivation and career planning and (6) the relationship between parents attention and learning motivation with career planning.

This research uses a descriptive correlational quantitative method. The sample was student of class X SMKN 3 Padang amounting 171, taken using proportional random sampling technique. The instruments used were parents attention questionnaire, learning motivation questionnaire and career planning questionnaire. Data were analyzed using correlational descriptive statistics.

The findings of the study showed that: (1) on average, the attention of parents that students have is in the high category, (2) on average, student learning motivation possessed by students is in the high category, (3) on average, career planning owned by students is in a good category, (4) There is a positive and significant relationship between parents attention and student career planning, (5) There is a positive and significant relationship between learning motivation and student career planning and (6) There is a positive and significant relationship between parents attention and learning motivation with students' career planning.

ABSTRAK

Atikah Rahmah Nasution. 2021. “Hubungan Antara Perhatian Orangtua dan Motivasi Belajar dengan Perencanaan Karier Siswa SMK”. Tesis. Fakultas Ilmu Pendidikan Universitas Negeri Padang.

Penelitian ini dilatarbelakangi oleh fenomena yang terjadi dilapangan yaitu rendahnya persiapan siswa dalam perencanaan karier. Perhatian orangtua dan motivasi belajar merupakan faktor yang diduga mempengaruhi perencanaan karier. Penelitian ini bertujuan untuk menganalisis: (1) perhatian orangtua, (2) motivasi belajar, (3) perencanaan karier, (4) hubungan perhatian orangtua dengan perencanaan karier, (5) hubungan motivasi belajar dengan perencanaan karier dan (6) hubungan antara perhatian orangtua dan motivasi belajar dengan perencanaan karier.

Penelitian ini menggunakan metode kuantitatif jenis deskriptif korelasional. Sampel penelitian adalah siswa kelas X SMKN 3 Padang yang berjumlah 171 orang, diambil dengan menggunakan teknik *proportional random sampling*. Instrumen yang digunakan adalah angket perhatian orangtua, angket motivasi belajar dan angket perencanaan karier. Data dianalisis dengan statistik deskriptif korelasional.

Temuan penelitian memperlihatkan bahwa: (1) secara rata-rata perhatian orangtua yang dimiliki oleh siswa berada pada kategori tinggi, (2) secara rata-rata motivasi belajar siswa yang dimiliki oleh siswa berada pada kategori tinggi, (3) secara rata-rata perencanaan karier yang dimiliki oleh siswa berada pada kategori bagus, (4) Terdapat hubungan yang positif dan signifikan antara perhatian orangtua dengan perencanaan karier siswa, (5) Terdapat hubungan yang positif dan signifikan antara motivasi belajar dengan perencanaan karier siswa dan (6) Terdapat hubungan yang positif dan signifikan antara perhatian orangtua dan motivasi belajar dengan perencanaan karier siswa.
