

ABSTRAK

Pengaruh Komunikasi Interpersonal terhadap Pelaksanaan Praktik Lapangan Industri Mahasiswa Pendidikan Teknik Bangunan UNP.

Oleh: Aldo Revo Nugraha

Penelitian ini dilatarbelakangi oleh masih banyaknya mahasiswa Program Studi Pendidikan Teknik Bangunan yang belum mampu menerapkan cara berkomunikasi yang baik sehingga mengalami kesulitan pada saat melaksanakan Praktik Lapangan Industri. Tujuan penelitian ini adalah untuk mengetahui pengaruh komunikasi interpersonal terhadap pelaksanaan Praktik Lapangan Industri mahasiswa Prodi Pendidikan Teknik Bangunan UNP.

Jenis penelitian ini adalah penelitian kuantitatif. Populasi penelitian ini adalah mahasiswa Program Studi Pendidikan Teknik Bangunan Universitas Negeri Padang Angkatan 2016 yang sudah melaksanakan PLI, berjumlah 72 mahasiswa. Pengambilan sampel dilakukan dengan teknik *Total Sampling* sehingga seluruh anggota populasi juga menjadi sampel penelitian. Namun karena peneliti juga merupakan bagian populasi dan tidak boleh menjadi sampel untuk menghindari bias, maka jumlah sampel menjadi 71 orang mahasiswa Program Studi Pendidikan Teknik Bangunan Angkatan 2016. Data dikumpulkan melalui kuesioner yang menggunakan skala Likert dan disebarluaskan kepada responden secara daring. Teknik analisis yang digunakan yaitu analisis korelasi dan uji hipotesis.

Hasil penelitian menunjukkan bahwa terdapat hubungan yang kuat antara komunikasi interpersonal dengan pelaksanaan Praktik Lapangan Industri mahasiswa Program Studi Pendidikan Teknik Bangunan angkatan 2016. Komunikasi interpersonal memiliki pengaruh positif yang signifikan terhadap pelaksanaan Praktik Lapangan Industri. Besarnya pengaruh komunikasi interpersonal terhadap pelaksanaan Praktik Lapangan Industri adalah 63,52%, sedangkan sisanya 36,48% dipengaruhi faktor-faktor lain.

Kata Kunci: Komunikasi Interpersonal, Praktik Lapangan Industri

ABSTRACT

- Aldo Revo Nugraha, 2021** : The Effect of Interpersonal Communication on the Implementation of Industrial Field Practices of Students of Building Engineering Education Study Program UNP
- Supervisor** : Risma Apdeni, S.T., M.T.

This research was motivated by the fact that there were still many students of Building Engineering Vocational Education Study Program who had not been able to perform good communication skill so that they found difficulties in implementing Industrial Field Practices. The purpose of this research was to determine the effect of interpersonal communication on the implementation of Industrial Field Practices of students of Building Engineering Vocational Education Study Program UNP.

This research is a quantitative research. The population of this study was students of Class of 2016 of Building Engineering Vocational Education Study Program UNP who had implemented Industrial Field Practices, totaling 72 students. Sampling was taken by using total sampling technique so that all members of the population also became the research sample. However, since the researcher is also a part of the population and should not be allowed to become sample to avoid bias, the sample size was 71 students of the Building Engineering Vocational Education Study Program Class of 2016. The data were collected through questionnaires using a Likert scale and distributed to the respondents online. The analysis techniques used were correlation analysis and hypothesis testing.

The results showed that there is a strong relationship between interpersonal communication and the implementation of Industrial Field Practices of students of the Building Engineering Vocational Education Study Program Class of 2016. Interpersonal communication has a positive significant effect on the implementation of Industrial Field Practices. Interpersonal communication affected the implementation of Industrial Field Practices by 63.52%, while the remaining 36.48% was affected by other factors.

Keywords: *Interpersonal Communication, Industrial Field Practices*
