

ABSTRACT

M Rizki Mahindra (2021): Coaching Athletics in Sungai Penuh City

The problem in this research is based on the decline in the achievement of the athletics of Sungai Penuh City. This can be seen from the decline in the number of PASI medals at the Jambi PORPROV event. This thesis is expected to make a positive contribution to the development of athletics in Sungai Penuh City.

This study used qualitative research methods. The data obtained in the study were collected through observation, interviews and documentation. To test the validity of the research data using the triangulation method.

The results of this study indicate that: 1) The management of PASI Kota Sungai Penuh has carried out their duties well starting from athlete recruitment activities to competitions. 2) The role of the coach is quite good, but there is a fundamental problem for coaches where the coaches do not have a license as athletic trainers. 3) Athletes who join PASI Kota Sungai Penuh have high discipline and motivation in participating in a series of coaching. 4) PASI Sungai Penuh City has quite good training facilities but the feasibility in terms of training infrastructure is still far from standard. 5) Most of the funding sources for coaching come from the full Sungai Sungai government budget and public donations.
