ABSTRACT

LearnEnglish Kids provides some media/tools such as songs and poems to help English learner enjoy their learning. This research aims to reveal EFL students' perception about using the website as autonomous learning to increase their vocabulary and English learning motivation by using descriptive research with quantitative approach. The researcher conducted the research because of have done teaching practice at SMP 15 Padang and find out some issues that were a low of students' vocabulary and low motivation. This research used purposive sampling to take the sample of the research. There were 65 students as research sample who takes purposively in six classes and 7 students as the interviewee. Data were collected through online google form by using questionnaire with 40 questions and interview with 9 questions. The data results on students' perceptions, concerning the motivation aspects and vocabulary aspect of using *LearnEnglish Kids* are provided in the findings. Findings indicate that students perceive songs and poems as enjoyable and effective tools for learning new vocabulary. Additionally, these resources appear to enhance students' motivation to engage with English learning outside the traditional classroom setting. The research suggests that integrating multimedia resources like songs and poems into autonomous learning strategies can significantly benefit vocabulary development and overall language learning motivation among EFL students.

Keywords: *Perception, LearnEnglish Kids, Autonomous learning, Vocabulary, Motivation*

ACKNOWLEDGEMENTS

Thanks to Allah, who gives His bless to us. Alhamdulillahirabbil'alamin, the researcher can accomplish this undergraduate thesis entitled " EFL Students' Perception on Using Songs and Poems from *LearnEnglish Kids* as Autonomous Learning Activity to Increase Vocabulary and English Learning Motivation" as one of the requirements to obtain the Bachelor of Education Degree (B.Ed.) in English Department, Faculty of Languages and Arts, Padang State University. Shalawat and Salam may always be upon Rasulullah SAW, his family, his colleagues, and everyone who follows his way. I would like to express my deepest gratitude and appreciation to everyone who helped me to complete this thesis.

My deepest gratitude goes to:

1. The head of the English Language and Literature Department, Dr. Yuli Tiarina, M.Pd , the academic supervisor, Dr. Ratmanida, M.Ed, Telf, and all lectures at the English Language and Literature Department, who have shared their meaningful knowledge.
2. Leni Marlina, S.S.MA as my supervisor, who has dedicated a significant amount of time, insightful advice, and meaningful effort to bringing my thesis through the finish line.
3. Dian Safitri, S.Pd., M.Pd. and Dr. Zul Amri, M.Ed. as the proposal reviewers in Maret, 2024, who have given their valuable contributions and meaningful suggestions for the improvement of this thesis.
4. Dr. Zul Amri, M.Ed., M.Pd, Syafitri Ramadhani, M.Pd., Dr. Zadrian Ardi, S.Pd., M.Pd. Kons and Leni Marlina, SS, MA, as the validators of my research instrument who have kindly assisted and guided the researcher in constructing and validating the test as the instrument of this thesis.
5. My beloved parents, Ir. Misdar Putra, MT and Islami, S.Pd for their prayers, support and extraordinary sacrifices so that the researcher can achieve all this and can give extraordinary pride.
6. My lovely siblings, Shafiya Nilam Ismira, S.E, Rafid Sati Nalemera, and Sabqi Tuah Pradistra. Thank you for always providing support and prayers in completing my thesis so that the researcher can obtain Bachelor of Education (B. Ed) in English Language Education.

CHAPTER I

INTRODUCTION

A. Background of study

In this era, foreign language teachers have many ways to make learning English enjoyable and fun. There are a lot of websites that can be used to learn English, for example *LearnEnglish Kids* website. Sadoughi & Hejazi (2022:1) said foreign language teachers, in particular, are essential in encouraging, helpful, secure, and friendly learning in order to improve students' foreign language accomplishment. In addition, Khan, et al. (2021:2) said compared to earlier methods of instruction, language learning has advanced with the use of expanding and widely accessible technology. As the global authority in English language teaching, *LearnEnglish Kids* website offers resources like “Learn English for Kids” which includes engaging songs, poems, games and activities suitable for young learners. It offers videos on how to use English at home, articles on helping students learn the language, and details about English classes for students. Even if there are more offerings from the website, the researcher will only focus on using the poem and songs that are available from the website to maximize the research. The website can be easy accessed by the junior high school students because it is free and easy to understand.

As the researcher has done the teaching practical in seventh grade students at SMP 15 Padang during August - December 2023, the researcher observed many students have low vocabulary mastery and low English learning motivation. These two aspects are very

important to be considered for the students as English foreign language (EFL) learners. According to Asnita & Marlina (2022:250), learning new words can be tough for students. For English as Foreign Language (EFL) students, a strong vocabulary can unlock English proficiency in all key areas – listening, speaking, writing, and reading. While mastering vocabulary is vital, students' motivation also plays a major role in their English learning progress. Monotonous teaching methods, still present in some classrooms, can unfortunately reduce this motivation and hinder active engagement. In overcome the problems, as pre-service teacher, the researcher has applied the use of songs and poems from *LearnEnglish Kids* in the classroom to introduce for the students about songs and poems from the website and also as one of teaching media during October – December 2023 (*see appendix 1 and 2*). When the researcher as pre-service teacher at school has practiced songs and poems from this website, most of the students enjoy to listen the poems and watch the video from songs.

After the students had listened and watched the songs and poems from the website, the researcher made eight groups of students did some exercises that were available on the website and the additional questions that were written by the researcher about its songs and its poems. Because the limited time learns English at school, the researcher applied autonomous learning to increase students' English skill by using songs and poems from *LearnEnglish Kids* at home. The students just learn English for about 2 hours 20 minutes per week so it cannot be maximized to master in English skills. Then, the students did another exercise from the website at home as an autonomous learning process. Website with hands-on features foster independent learning, which is crucial for both large -group

EdTech setting (Jordan et al., 2021:69) and self-directed learning outside of formal education (Huntington et al., 2023:189). The researcher has applied 10 songs and 10 poems from *LearnEnglish Kids* as autonomous learning for seventh grade students at SMP 15 Padang. The criteria of the selected songs and poems were songs and poems which have the low duration and related to the topic of students' English learning. From the autonomous learning process, the study aims to assess the clarity of student perceptions regarding their English language learning through *LearnEnglish Kids* website especially for *LearnEnglish Kid's* songs and poems. The researcher will conduct the research about any specific aspect can be influenced by using songs and poems from this website such as vocabulary mastery and learning motivation based on students' perception.

By using different ways to learn English and knowing how students' perception on the website, whether or not the level of student motivation in learning English can increase, teachers can evaluate how English will be taught in the future. If using this website can increase students' motivation to learn English independently based on students' perception, then, teachers can start regularly using this website for students' autonomous learning especially at their home. The significance of students' perception is important, particularly in aiding the teachers to enhance the teaching-learning process and prepare effective autonomous learning for future sessions (Iqbal & Rosita, 2022:298). Therefore, the outcome of student perception plays a crucial role in this research.

The researcher has reviewed several studies about using digital English website such as storybookscanada.ca, storynory.com, and prathambooks.org that conducted by

Andricos & Marlina (2023), Ahwida & Marlina (2023) and Yuliani & Marlina (2023). Andricos & Marlina (2023) highlight the potential of storybookscanada.ca as digital children's literature as valuable learning resources for EFL students looking to expand their vocabulary and improve their English skills. Furthermore, Ahwida & Marlina state that using digital children's literature from storynory.com significantly reduced listening anxiety among EFL college students in the English Department at UNP. Through daily exposure to engaging stories and a pre-test, post-test, the results show a positive impact on students' feelings about listening (2023). Additionally, Yuliani & Marlina, L. (2023) state incorporating digital children's literature into EFL vocabulary instruction can be a beneficial and effective practice.

The researcher has also reviewed several studies on related topic such as learner autonomy in vocabulary development by Almusharraf (2021) that highlight the importance of student independence in learning new words in Saudi EFL classroom. Second, teacher perceptions of songs by Khumairo, Inayati, & Tyas, (2022) that explore how pre-service and in service teachers view using English children's songs for young learners. Third, student perceptions of autonomous learning by Khulaifiyah et al. (2021) that investigated Indonesian students' perspectives on independent learning activities. Fourth, incidental vocabulary acquisition by Rahul & Ponniah (2023) that examine the impact of watching on-screen content on passively acquiring vocabulary through listening. Lastly, students' demographics and language learning by Sabiq (2023) that studies how factors like age and school location influence Indonesian students' attitudes and motivation towards English learning.

Existing research has explored digital children's English websites, learner autonomy, teacher perception of songs, student perspectives on independent learning, and incidental vocabulary acquisition through digital content. However, lack of studies have specifically investigated **"EFL Students' Perception on Songs and Poems from *LearnEnglish Kids* as Autonomous Learning Activity to Increase Vocabulary and English Learning Motivation"**. While there are studies that highlight the benefits of using songs and poems in English language learning, there is a need for more research that focuses on the specific resources provided by *LearnEnglish Kids* and how they can be utilized effectively in autonomous learning activity. Therefore, the researcher will conduct the research about the topic to provide valuable insight for educators who want to utilize digital resources effectively to promote autonomous English language learning among EFL seventh grade students in Indonesia to increase students' vocabulary mastery and motivation.

B. Identification of the Problem

Based on the background, there are several issues that can be investigated as follows:

1. EFL students at SMP 15 Padang face difficulties in mastering vocabulary
2. Monotonous learning methods negatively impact to EFL Students' learning motivation at SMP 15 Padang
3. Time constraints pose a challenge for EFL students at SMP 15 Padang

4. There is no clear perception regarding the positive or negative impact of using songs and poems in EFL learning at SMP 15 Padang

C. Limitation of the Problem

In this research, the researcher primarily focused on analyzing the students' perception on using songs and poems from *LearnEnglish Kids* website to improve EFL junior high school students' vocabulary and English learning motivation. The researcher focused on using the songs and poems from *LearnEnglish Kids* website for seventh grade students in SMP 15 Padang.

D. Formulation of the Problem

There are several applications and websites that be used to increase EFL students' vocabulary and English learning motivation. Focusing specifically on using songs and poems from *LearnEnglish Kids* website, renowned for increasing vocabulary and motivation. This research is conducted to answer the following formulated question as "What is EFL students' perception on using songs and poems from *LearnEnglish Kids* to increase vocabulary and English learning motivation of seventh grade students at SMP 15 Padang?"

E. Research Question

Based on the study background problem, the researcher makes research questions as the following:

1. How is the EFL students' perception on using digital children's songs from *LearnEnglish Kids* website as autonomous learning influence English learning motivation for seventh grade students at SMP 15 Padang?

2. How is the EFL students' perception on using digital children's poems from *LearnEnglish Kids* website as autonomous learning influence English learning motivation for seventh grade students at SMP 15 Padang?
3. How is the EFL students' perception on using digital children's songs from *LearnEnglish Kids* website as autonomous learning influence vocabulary mastery for seventh grade students at SMP 15 Padang?
4. How is the EFL students' perception on using digital children's poems from *LearnEnglish Kids* website as autonomous learning influence vocabulary mastery for seventh grade students at SMP 15 Padang?

These research questions aim to explore various aspects of students' perceptions and experiences with digital learning resources in the context of their English language education at Junior High School 15 Padang. They cover areas such as engagement, vocabulary mastery, and motivation.

F. Objective of the research

The objective of the research on students' perception of using digital children's songs and poems from *LearnEnglish Kids* English classrooms at the seventh grade of Junior High School 15 Padang is to:

1. Understanding students' perception on using songs from *LearnEnglish Kids* to increase English learning motivation.
2. Understanding students' perception on using poems from *LearnEnglish Kids* to increase English learning motivation.

3. Understanding students' perception on using songs from *LearnEnglish Kids* to improve students' vocabulary.
4. Understanding students' perception on using poems from *LearnEnglish Kids* to improve students' vocabulary.

G. Significance of the research

This research is important to conduct because the perception of the students has a great impact on their learning process. From the previous research, there is no specific discussion about using *LearnEnglish Kids* such as poems and songs that has been implemented for Junior High School students. By focusing on specific platform like *LearnEnglish Kids* website, the research practically provides valuable insight for improving teaching practices and student learning outcomes in EFL contexts. This research can theoretically implicate the understanding of language acquisition.

H. Definition of the Key Terms

1. Autonomous Learning is independence learning that students have the power to regulate their learning activities.
2. *LearnEnglish Kids* website is one of digital resources that has interactive design with several offerings such as poems and songs which can be used to learn English for the students.
3. Song from *LearnEnglish Kids* is a simple musical composition with lyrics designed to entertain, educate, or engage students.

4. Poem from *LearnEnglish Kids* is a creative and playful use of language with rhythm, rhyme, and imagery that sparks students' imagination and emotion.
5. Vocabulary is the collection of words that students understand in a language.
6. Motivation is the process that initiates, guides, and maintains goal-oriented behaviors.
7. Perception is the way that students think about media from the website or the impression students have of it.
